

## Unbundled Loops Performance for 1/1/96 to 9/30/96

## SERVICE PERFORMANCE MEASURES

## Unbundled Loops Glossary and Calculation Data

---

### GLOSSARY

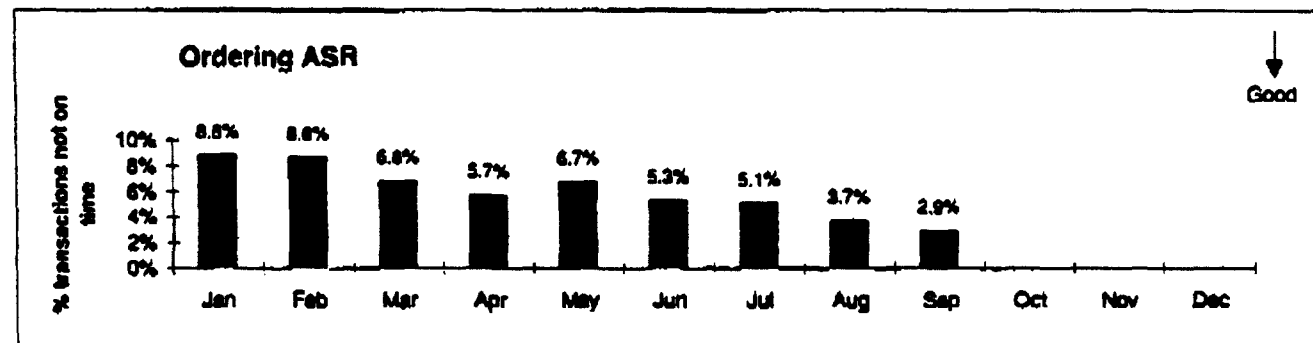

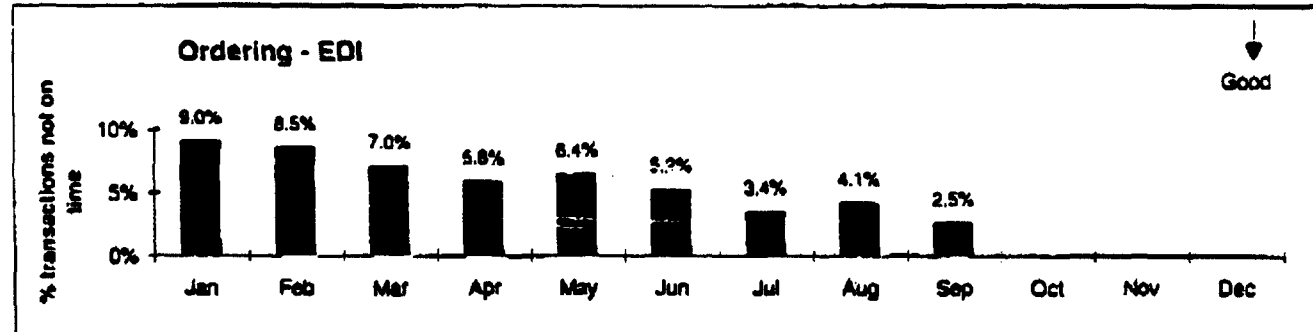

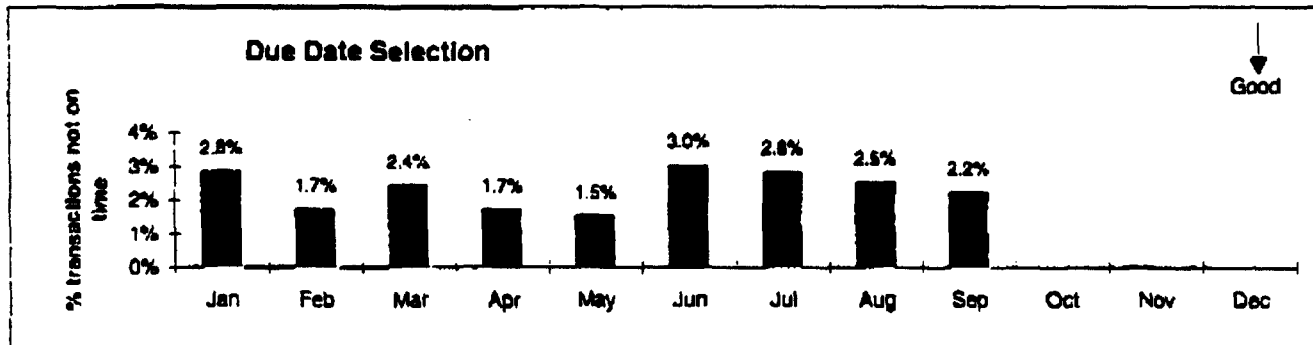

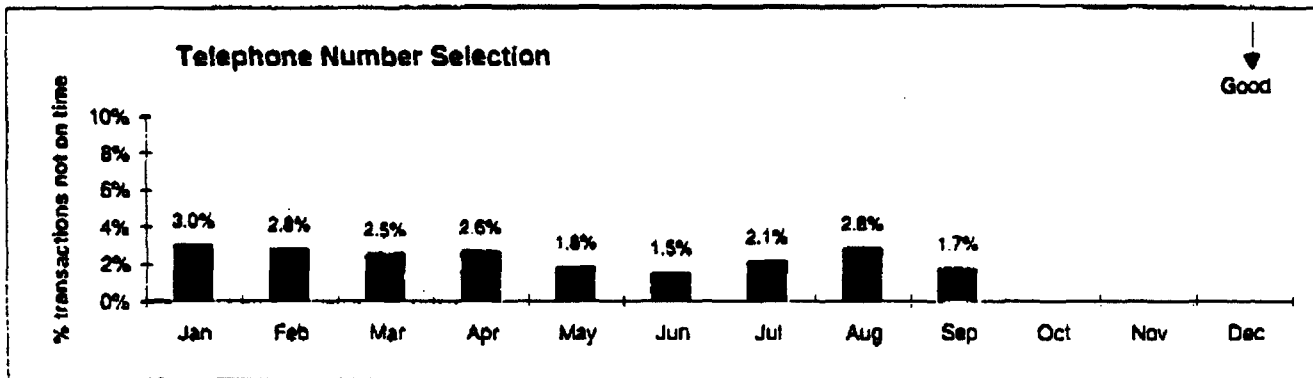

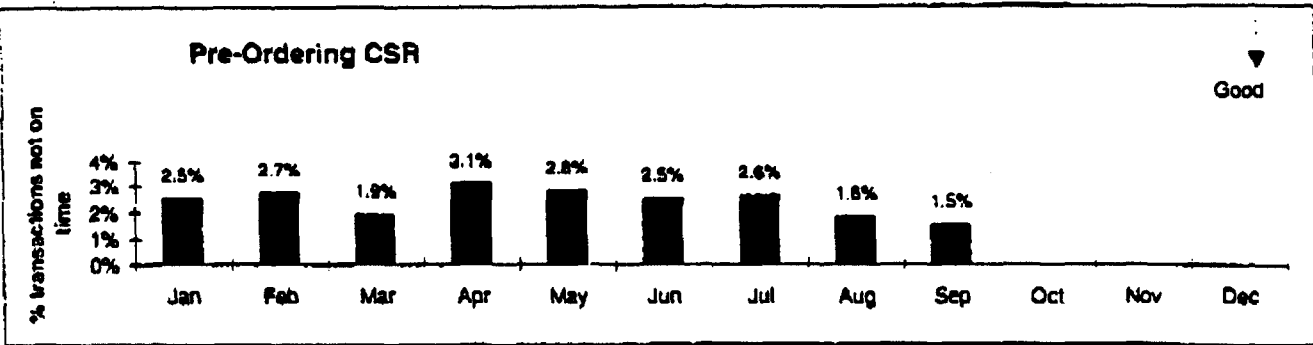

Installation Intervals	The agreed-upon interval of time allotted for installation to be performed.
Service Due Dates	The agreed-upon date when service order is due.
New Service Failures	Trouble reported on an installation within 30 days after the original installation is complete.
Trouble Report	Trouble reported by the customer on a service.
Mtce Repeats	Trouble reported on a service within 30 days after the original maintenance work is performed.
FOC	Firm Order Confirmation. An acknowledgement to a customer confirming circuit number, order number, and various critical dates. FOC response times vary based on the type of service ordered.

---

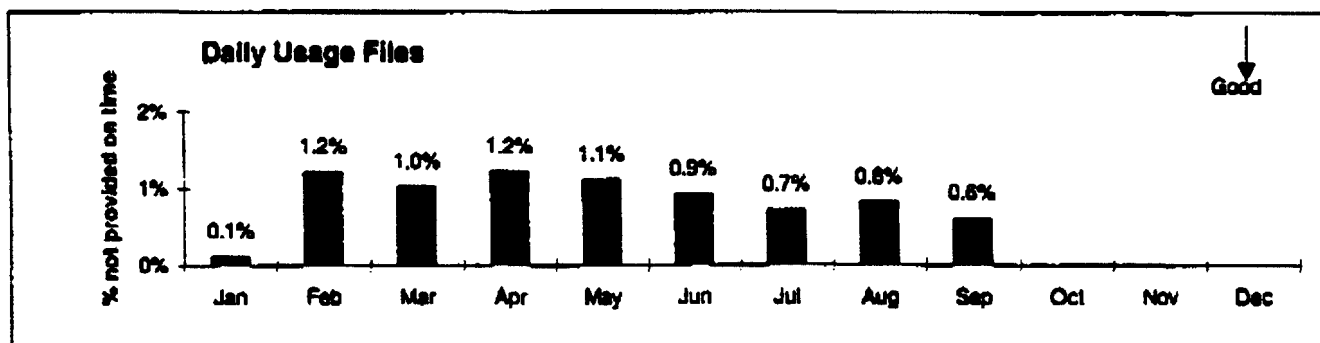

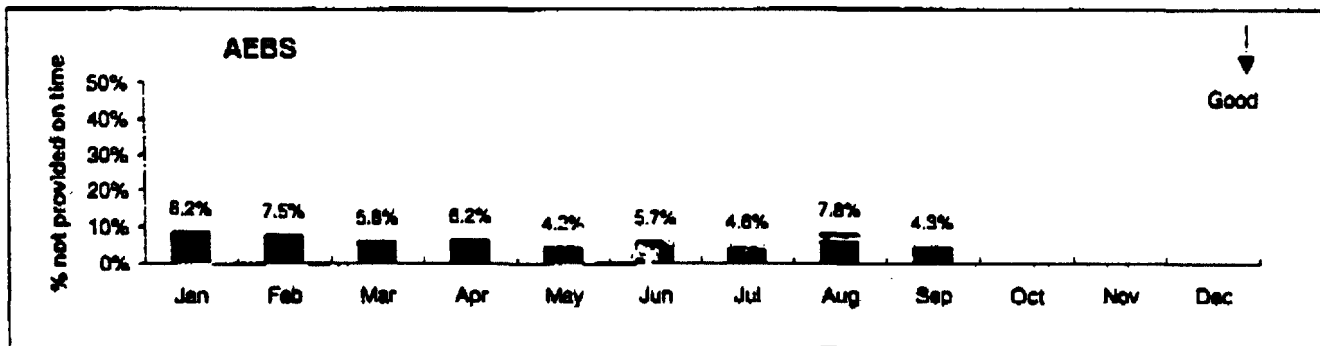

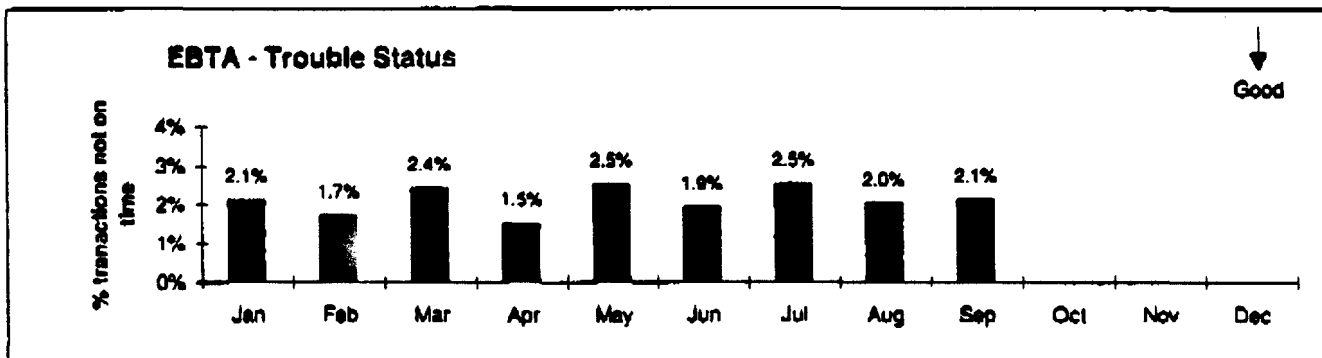

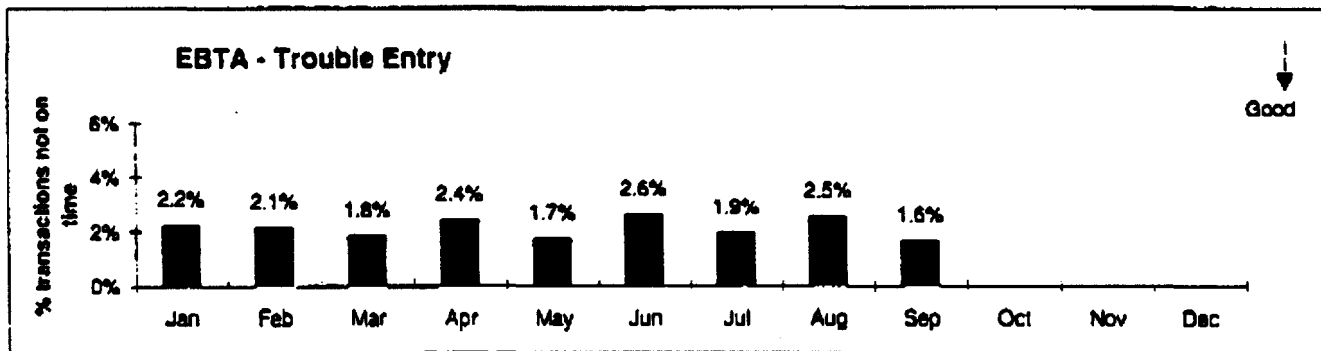

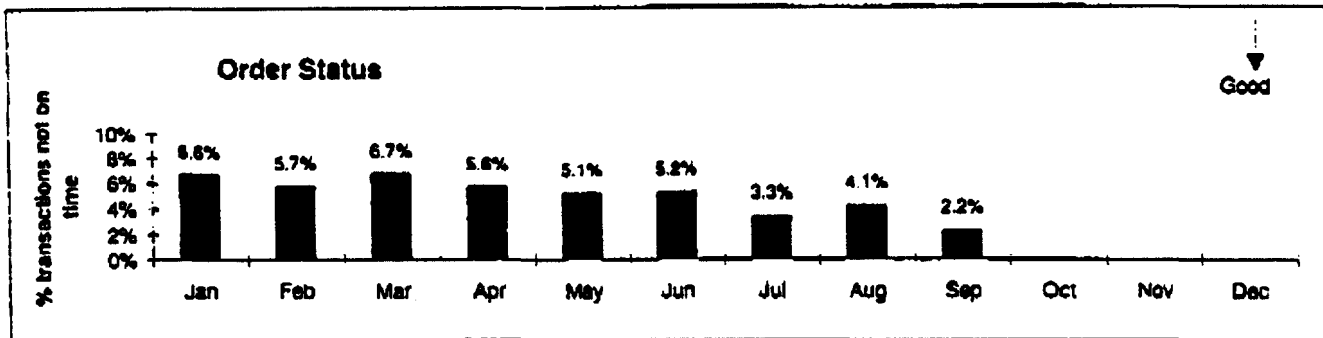

### CALCULATIONS

Installations Outside of Interval	The Percent of Installations Outside of Interval is calculated by dividing the number of installations not completed within the agreed upon time interval by the total number of installations in the reporting period.
Due Dates Not Met	The Percent of Due Dates Not Met is calculated by dividing the number of missed appointments by the total number of appointments in the reporting period.
New Service Failures	The Percent of New Service Failures is calculated by dividing the number of lines that failed within thirty days after installation by the the total number of installations in the reporting period.
Trouble Report Rate	The Trouble Report Rate is calculated by dividing the number of lines reported with trouble by the total number of lines in service in the reporting period.
Percent Repeats - Mtce	The Percent Repeats - Mtce is calculated by dividing the number of repeat reports by the total number of lines in service in the reporting period.
OOS Over 24	The Percent of OOS Over 24 is calculated by dividing the number of lines not restored within 24 hours by the total number of lines reported out of service in the reporting period.
FOC	The Percent of FOC is calculated by dividing the number of requests for service not provided within the agreed upon interval by the total number of requests for service in the reporting period.
Speed of Answer - Ordering	The Percent of Speed of Answer - Ordering is calculated by dividing the number of ordering calls not answered within 10 seconds by the total number of ordering calls in the reporting period.
Speed of Answer - Prov/Mtce	The Percent of Speed of Answer - Prov/Mtce is calculated by dividing the number of Prov/Mtce calls not answered in 20 seconds by the total number of Prov/Mtce calls in the reporting period.

SWBT'S RESPONSE TO  
PUBLIC UTILITY  
COMMISSION OF TEXAS'  
REQUEST FOR  
INFORMATION

RECEIVED APR 28 1997

April 24, 1997

Christian A. Bourgeois  
Attorney

Ms. Paula Mueller  
Secretary of the Commission  
Public Utility Commission of Texas  
1701 North Congress  
Austin, Texas 78701

**Re: Project No. 16251; Investigation of Southwestern Bell Telephone Company's entry into the Texas interLATA Telecommunications Market**

Dear Ms. Mueller:

Enclosed please find the original and four copies of Southwestern Bell Telephone Company's (SWBT) responses to the Commission's requests for information (RFIs) in the above proceeding. Pursuant to the protective order entered in this project, SWBT is submitting certain of its responses under seal, as noted in the filed responses. For responses provided to RFI Nos. 1, 2, 3, 5, 6, 9, 10 and 106, SWBT claims that such information is confidential. Further, SWBT does not waive its position set forth in its appeal of Order No. 3 herein for a higher classification.

SWBT states that the information it is submitting under seal is exempt from disclosure under the Texas Open Records Act pursuant to Sections 552.101, 552.110 and 552.104. These applicable exemptions include trade secrets, commercial or financial information of SWBT and, if disclosed, could place SWBT at a competitive disadvantage, especially in light of the number of competitors created by state and federal legislation. In further support of its claim that the information provided is confidential information and exempt from disclosure, SWBT would note the following:

1. The confidential information in this proceeding is not generally known outside of SWBT. This information is an internal company work product based on SWBT resources.
2. The information is distributed only on a limited basis within SWBT, and only to those with a need to know.
3. SWBT's offices in which this information is maintained are either locked and/or entry is controlled by security personnel.

1616 Guadalupe, Room 600  
Austin, Texas 78701

Phone 512 870-5712  
Fax 512 870-3420

Ms. Paula Mueller  
Project No. 16251  
April 24, 1997  
Page Two

4. This information would be extremely valuable to competitors of SWBT because it would reveal marketing data and information SWBT uses or could use in setting prices for its services. Access to this information could permit competitors to undercut SWBT's prices.

5. SWBT has expended numerous amounts of management and clerical time to develop this information.

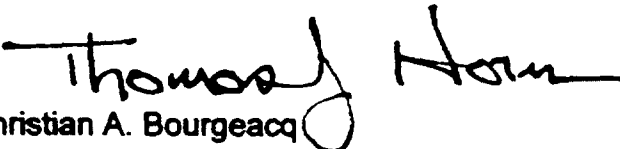

6. This information would be extremely difficult for a competitor to acquire or duplicate.

Counsel for SWBT has reviewed the information sufficiently to state in good faith that the information merits the confidential designation and is exempt from public disclosure under the Open Records Act.

Finally, SWBT states that its responses to these RFIs are based on knowledge, information or belief it has to date and that it intends to supplement its responses through investigation of the subjects covered by the RFIs, as well as from information it receives in this project.

If you have any questions concerning this filing, please call me. Thanks.

Sincerely,

For/   
Christian A. Bourgeacq

Enclosures

All parties of record (U.S. mail)  
PUC Central Records (hand-delivered)

Docket No. 16251  
General Counsel  
First Request  
Information Request No. 18-JE  
04/24/97

18-JE.

Please set forth in detail SWBT's record in responding to requests regarding collocation, including provisioning intervals, availability of space, and warehousing of space.

Answer: SWBT has received fifty-seven (57) applications for physical collocation in Texas. Four (4) of those applications have been completed and are working. Five (5) applications are scheduled to be completed within two months. Eleven (11) applications have been priced and quoted to the customer, and we are awaiting their response. Two (2) applications were not quoted because of the unavailability of space in these offices (DLLSTXRO and SNANTXMC). Five (5) applications are in the process of being quoted. Thirty (30) quoted applications were declined by the LSPs.

Forty-nine (49) virtual collocation applications have been received by SWBT in Texas. Thirty-six (36) of those applications have been completed and are working. Four (4)

applications have been priced and quoted to the customer, and are awaiting their response. Nine (9) applications were declined by the LSPs.

The above transactions have been processed in accordance with the following policy. SWBT provides to CAPs/LSPs a copy of the SWB Interconnection Technical Publication for Physical Collocation. Upon a request, a completed application, a blank is in the Technical Publication, and the engineering and design charge (compensation for SWBT's labor to provide physical collocation quotation) is sent to the SWBT Dallas ICSC. The ICSC representative time and date stamps the application and forwards it to the appropriate SMEs responsible for the central offices requested by the LSP. SWBT has 35 business days from the receipt of an LSP's application to provide the applicant the quote of estimated charges and a completion interval. The LSP has 35 business days to accept or reject SWBT's quotation. The LSP accepts the quotation by paying half of the estimated quote within 35 business days. SWBT then begins construction of the LSP requested arrangement to be completed within the quoted

Docket No. 16251  
General Counsel  
First Request  
Information Request No. 18-JE  
Page 3 of 4  
04/24/97

interval. In instances where an LSP provides more than 5 applications within 5 business days, SWBT has an additional 10 business days for an LSP response (45 business days). In compliance with the Act, the FCC's August 8, 1996 Order in Docket 96-325 at Part 1, Title 457 of the Code of Federal Regulations at 51.323, SWBT will provide Physical Collocation wherever space and power are available and physical collocation is not impractical for technical reasons. When physical collocation is not available, SWBT will provide virtual collocation unless SWBT can prove that virtual collocation at a specific location is not technically feasible.

SWBT will provide space on a first come, first served basis, provided however that SWBT is not required to lease or construct additional space to provide for collocation when existing space has been exhausted.

SWBT is permitted in the FCC's August 8, 1996 Order in Docket 96-325 at Part 1, Title 47 of the Code of Federal Regulations at 51.323 to retain a limited amount of floor space for

Docket No. 16251  
General Counsel  
First Request  
Information Request No. 18-JE  
Page 4 of 4  
04/24/97

future specific needs before relinquishing all of its space for physical collocation. Additionally SWBT is required to impose reasonable restrictions on the warehousing of unused space leased by LSPs for the purpose of interconnection or access to unbundled network elements. Because SWBT cannot impose space limitations upon requesting LSPs, SWBT is requiring that LSPs place at least some operational telecommunications equipment somewhere within the space ordered by the LSP within a negotiated time period. Because the FCC Order requires that SWBT provide LSPs the ability to request space for the same planning interval that SWBT itself uses, SWBT cannot insure that some warehousing of space on the part of the LSPs will not occur. Attached are lists of the existing collocation requests, dates they were responded to and the status.

19-JE.

Please list the LSPs that have requested physical or virtual collocation, state the number of times each LSP has requested physical or virtual collocation, and identify with specificity the locations in which such collocation was sought.

Answer: The following LSPs have requested virtual collocation in Texas: American Communications Systems, Inc. (ACSI); GST Lightwave Texas, Inc. (GST); IntelCom Group (ICG); MCI Metro; Metro Access; Metropolitan Fiber Systems (MFS); Teleport Communications Group (TCG); and Time Warner. The following LSPs have requested physical collocation in Texas: ASCI; AT&T; FiberCom; ICG; MCI Metro; Metro Access; MFS; TCG; and Time Warner.

ACSI has submitted 13 virtual collocation requests. Those requests cover the following Texas cities and central offices: Amarillo - AMRLTX02, AMRLTXFL; Austin - AUSTTXGR;

Corpus Christi - CRCHTXTU; Dallas - DLLSTXAD, DLLSTXMC; El Paso - ELSPTXMA, ELPSTXSE, ELPSTXHA; and Fort Worth - FTWOTXAT, FTWOTXEC, FTWOTXED, FTWOTXEU. ACSI has submitted 10 physical collocation requests. Those requests cover the following Texas cities and central offices: Amarillo - AMRLTXEV, AMRLTXFL; Corpus Christi - CRCHTXTU; Dallas - DLLSTXAD, DLLSTXRI, DLLSTXTA; and Fort Worth - FTWOTXAT, FTWOTXEC, FTWOTXED, FTWOTXEU.

AT&T has submitted 15 physical collocation requests. Those requests cover the following Texas city and central offices: Dallas - DLLSTXAD, DLLSTXDA, DLLSTXDI, DLLSTXEM, DLLSTXFB, DLLSTXFL, DLLSTXLA, DLLSTXME, DLLSTXNM, DLLSTXNO, DLLSTXRE, DLLSTXRI, DLLSTXRN, DLLSTXRO, DLLSTXTA.

FiberCom has submitted 2 physical collocation requests. Those requests cover the following Texas city and central offices: San Antonio - SNANTXCA, SNANTXMC.

GST has submitted 2 virtual collocation requests. Those requests cover the following Texas cities and central

offices: El Paso - ELPSTXMA; and San Antonio - SNANTXCA.

ICG has submitted 1 virtual collocation request. That request covers the following Texas city and central office: San Antonio - SNANTXCA. ICG has submitted 3 physical collocation requests. Those requests cover the following Texas cities and central offices: Austin - AUSTTXGR; Corpus Christi - CRCHTXTU; and San Antonio - SNANTXCA.

MCI Metro has submitted 4 virtual collocation requests. Those requests cover the following Texas cities and central offices: Dallas - DLLSTXAD, DLLSTXRI; and Houston - HSTNTXCA, HSTNTXNA. MCI Metro has submitted 2 physical collocation requests. Those requests cover the following Texas cities and central offices: Dallas - DALLSTXRI AND DLLSTXAD.

Metro Access has submitted 2 virtual collocation requests. Those requests cover the following Texas cities and central offices: Austin - AUSTTXGR; and Fort Worth - FTWOTXED. Metro Access has submitted 7 physical collocation requests.

Those requests cover the following Texas cities and central offices: Austin - AUSTTXTE; Dallas - DLLSTXTA; Fort Worth - FTWOTXCR, FTWOTXED; Houston - HSTNTXCL; and San Antonio - SNANTXCA, SNANTXD1.

MFS has submitted 11 virtual collocation requests. Those requests cover the following Texas cities and central offices: Dallas - DLLSTXAD, DLLSTXFB, DLLSTXME, DLLSTXNO, DLLSTXRI, DLLSTXRN, DLLSTXRO, DLLSTXTA; and Houston - HSTNTXCL, HSTNTXGP, HSTNTXNA. MFS has submitted 8 physical collocation requests. Those requests cover the following Texas cities and central offices: Dallas - DLLSTXAD, DLLSTXFB, DLLSTXRI, DLLSTXRN, DLLSTXTA; and Houston - HSTNTXCL, HSTNTXGP, HSTNTXNA.

TCG has submitted 5 virtual collocation requests. Those requests cover the following Texas cities and central offices: Dallas - DLLSTXRI; Fort Worth - FTWOTXED ; and Houston - HSTNTXCL, HSTNTXNA. TCG has submitted 4 physical collocation requests. Those requests cover the following Texas city and central offices: Dallas - DLLSTXAD, DLLSTXRI.
